### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Chad Anderson on 10/07/03.

The application has been amended as follows:

Claims 31 and 32 were cancelled.

In claim 12, lines 8-10, "whereby the wrappers are caused to roll due to contact with said surfaces and to thus convolute the strips thereabout" was deleted and - - ; means for convoluting the strips about the wrappers- - was inserted.

In claim 18, lines 8-10, "whereby the wrappers are caused to roll due to contact with said surfaces and to thus convolute the strips thereabout" was deleted and - - ; means for convoluting the strips about the wrappers- - was inserted.

The following is an examiner's statement of reasons for allowance: The primary reason for allowance is that the prior art of record fails to disclose an apparatus for treating smoker products wherein the rod shaped component is surrounded by a tubular wrapper carrying a deformable strip in combination with a means for changing the permeability of the wrappers and means for convoluting the deformable strip about the wrapper. The closest prior art, Dombek (US 6,363,942), only changes the permeability of the wrapper but does not convolute a deformable strip around the wrapper.

Art Unit: 1731

The cited prior art does not disclose or reasonably suggest a cigarette rolling apparatus having means for changing the permeability of wrapper having a first portion of a channel defined by two endless bands, a second portion of the channel defined by a stationary rolling member, and a flat stationary rolling surface as recited in claim 29.

Nor does the cited prior art disclose or reasonably suggest a cigarette rolling apparatus having means for changing the permeability of wrapper, a flat stationary rolling surface, and three endless bands as recited in claim 30.
